**Your privacy and personal data**

We gladly inform you about the processing of your personal data.

We store your personal and medical data digitally, in order to provide you with good care. We process your personal data according to our privacy and data safety policy. You agree with this storage (processing) by having your care carried out by our practice.

This is how we process your personal data:

- Your personal data is stored and used in order to provide you with good care.
- Your personal data is only shared with other parties in order to provide good care. When it is legally necessary to ask your permission first, we will ask this particular permission beforehand.
- Your personal data is processed in accordance with the treatment agreement as described in the 'Medical Treatment Contracts Act' (in Dutch: WGBO).
- You may see parts of your personal data. If you are interested in this, please send us a written request..
- You may request us verbally to adjust your personal data, when you think your personal data that we have stored is incorrect.
- You may request us to erase your personal data. When we do so, we are (or may) not be able to provide you with good care. The Dutch 'Medical Treatment Contracts Act' demands a holding period of 15 years. In that case we store your data in an inactive archive, invisible and unusable for normal users.
- You may withdraw your given permission regarding us processing your personal data. When you do so, we are (or may) not be able to provide you with good care any longer. In that case we store your data in an inactive archive (see above).
- You may object to the way we process your personal data.
- We will inform you when something goes wrong with your personal data.
- We store your personal data only for as long as necessary to provide you with good care. We do this according to the legal holding period stated by the 'Medical Treatment Contracts Act'.
- Everything stated above also applies to personal data we receive from third parties. Like all obstetric care providers in the Netherland, our practice works with the legally required national obstetric registration (Perined & Peridos). We submit your personal data. Data involving treatment is used for scientific research, quality improvement and for legally required quality indicators.
- After the birth of your child, you will receive an email from Perined with a short (national) questionnaire - the PREM Geboortezorg - to improve the care. For more information about this questionnaire, we refer to our website.
- If necessary, we will ask you for your medical history from your general practitioner or specialist. We use your data in the context of peer consultation.
- If birth announcements are sent to the practice on your own initiative, you give permission to show them in our office and you are aware that other customers can see the birth announcement.

***I give my permission to store and process my personal data in accordance with the conditions stated above***

Name client: (please state your full name) BSN and date of birth
